

**IS YOUR
CHILD
FAILING IN
SCHOOL...**

**TOGETHER
WITH YOUR
CHILD WE
MAKE THE
DIFFERENCE**

As a former teacher with a master's Degree in Education Administration, Evelyn Mack has seen, first hand, the failings of today's public schools. But as one lone voice, she was nearly powerless to make meaningful changes in the entrenched education bureaucracy.

It was when her own son began falling behind in reading, that she decided to take matters into her own hands. Determined that her son wouldn't graduate from school with a diploma he couldn't read, Mrs. Mack embarked on a quest for a truly effective reading program. Her search led her to Charlotte Lockhart, creator of the Discover Intensive Phonics program. With Ms. Lockhart's help, Evelyn Mack's son not only improved, but actually excelled in reading in just a few short months. **Inspired by her son's** success, Mrs.

Mack learned the Discover Intensive Phonics teaching methods, and used the program as the foundation for the unique curriculum she now offers. Children from all over Charlotte are reading and succeeding, thanks to the skills they've acquired at the Evelyn Mack Academy.

If your child is falling behind in reading or math, call us. We'll schedule a confidential appointment to discuss your child's special needs and explain our program in complete detail.

When children fall behind in school, school officials often place the blame on scientific sounding things like 'learning disabilities' and 'attention deficit disorder'. The sad fact of the matter is that children aren't effectively learning the basics anymore. And without a solid foundation in the fundamentals of reading and arithmetic, children are doomed to lives as functionally illiterate adults, unable to fully participate in the real world

Millions of Americans lack the basic reading skills to read their morning newspaper, workplace regulations ... even traffic signs. Not because they're not smart enough to learn to read, but because they've never been given the proper foundation necessary for reading well.

Learning to read doesn't need to be difficult. The answer is the time-tested method known as *phonics*. There are only 42 sounds in the English language. Once your child masters the 42 sounds of the alphabet, the five basic phonic skills and the two simple steps for decoding words, he or she can read *anything*.

And your child will enjoy reading. Because reading will be transformed from a painful chore to an exciting learning skill. Good reading skills will result in improved interest and better grades in your child's other subjects, as well.

In as little as 30 to 60 hours at Evelyn Mack Academy, your child can master all the vital reading skills necessary for success in school and in life. Our students enjoy our logical, sequential lessons. Lessons that build self-image and confidence, as well as reading skills. Your child will be an active participant in the learning process, using the chalk board and computer in addition to working with the instructor.

Our students learn how and why words are misspelled and pronounced the way they are. They analyze words and learn their meanings. As a result of our well-planned and position program, your child will begin to read well, spell accurately, and even develop better handwriting. He or she will become a happy learner, confident, secure, and independent.

If you can't afford \$5,000 to \$10,000 per year for private tuition, the Evelyn Mack Academy will help you find funding to help you enroll your child in our private school to make it more affordable. You can give your child the skills necessary to compete and succeed in school, in the workplace, and in life.

And reading isn't all we teach. If your child is having trouble mastering mathematics, and study skills talk to us. At the Evelyn Mack Academy we can also turn math from frustration to fun. Just as with reading, success with mathematics depends on mastery of the basic skills. Your child's teacher might have glossed over these skills, but at the Evelyn Mack Academy we *emphasize* them.

PROGRAMS AND SERVICES

Assessment -

- Comprehensive Individualized Testing
- Personalized Educational Plan to Meet Your Child's Needs

Tutoring -

- Pre and Post Test Evaluation
- Oral Written Evaluation
